REMINDER REGARDING CHAPTER II (Article 31(2)(a) and Rule 54.2)

If the applicant wishes to postpone entry into the national phase until 30 months (or later in some Offices) from the priority date, a demand for international preliminary examination must be filed with the competent International Preliminary Examining Authority before the expiration of 19 months from the priority date.

It is the applicant's sole responsibility to monitor the 19-month time limit.

Note that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination.

REMINDER REGARDING ENTRY INTO THE NATIONAL PHASE (Article 22 or 39(1))

If the applicant wishes to proceed with the international application in the national phase, he must, within 20 months or 30 months, or later in some Offices, perform the acts referred to therein before each designated or elected Office.

For further important information on the time limits and acts to be performed for entering the national phase, see the Annex to Form PCT/IB/301 (Notification of Receipt of Record Copy) and Volume II of the PCT Applicant's Guide.

Applicant CIBA SPECIALITY CHEMICALS HOLDING INC.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 4 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

- a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing:

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ Certain claims were found unsearchable (See Box I).

3. ☐ Unity of invention is lacking (see Box II).

4. With regard to the **title**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

☐ the text is approved as submitted by the applicant.

☒ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☐ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

☐ None of the figures.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/06934

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):
Description, pages:

1-26 as originally filed

Claims, No.:

1-15 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
☐ the language of publication of the international application (under Rule 48.3(b)).
☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority in written form.
☐ furnished subsequently to this Authority in computer readable form.
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.:
☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:
see separate sheet

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

D1: EP-A-0 902 083
D2: EP-A-0 717 103
D3: EP-A-0 630 964
D4: WO-A-97 16521
D5: WO-A- 96 37593
D6: GB-A-2 309 976

1. The subject-matter of claims 1 - 8 is known (Art. 33(2) PCT).
 - 1.1. D1 claims the same type of manganese complexes as the application. The intermediates of the preparation process of claim 28 disclose the subject-matter of independent claim 1. 0.005 to 2 wt.-% of the manganese complex is added to a slurry containing 5 - 90 wt.-% of an anionic and/or nonionic surfactant and 5 - 70 wt.-% of a builder, which slurry is then spray dried. (claims 28, 22, 15 - 21; page , lines 18 - 36). Since the meaning of dissolution restrainer has no well-recognised meaning, the surfactants and builder fall under this definition. The spray-dried products are granules and contain not more than 5, preferably 0 - 1 wt.-% of water.
Hence, the subject-matter of claims 1 - 8 is known.
 - 1.2. The same argumentation applies to D2 (claims 1, 27, 15- 22; page 6, lines 10 - 12, 16 - 18) and D3 (claims 23, 1, 11 - 17).
 - 1.3. The subject-matter of claim 15 is not disclosed in any of the documents D1 to D3. D1 to D3 disclose detergent granules comprising up to 2 wt.-% of the manganese complex. However, this granule is not part of a further detergent composition as required by claim 15.

2. It is quite common in the detergent industry to prepare granular compounds comprising different ingredients (see D4 - D6).

A skilled person would have combined the manganese complex with further compounds such as builder or surfactants.

The application does not provide any evidence that the problems of stability or dye transfer inhibition have been solved over the whole range. Only polymers are used in the examples to provide evidence for the unexpected dye-transfer inhibiting properties. The application is however not limited to polymers as dissolution restrainer. A generalisation of polymers to any kind of dissolution restrainer cannot be accepted.

At present the polymers of claims 12 and 13 encompass known dye transfer inhibitors such as PVP, polyvinylimidazoles, PVA....

No unexpected effect has been substantiated for these obvious combinations.

In addition, compounds such as peroxide, which could be regarded as a dissolution restrainer and which certainly would react with the manganese complex would certainly not solve the problems posed in the application. Hence the subject-matter of claims 1 - 15 does not comply with the requirements of Art. 33(3) PCT.

3. None of the cited documents gives an indication that the dye-transfer inhibiting properties of salen-type manganese complexes can be improved by applying the manganese complex as a granule comprising specific polymers as specified in claims 12 and 13.

Re Item VIII

Certain observations on the international application

1. The terms "salen-type manganese complex" and dissolution restrainer" used in claim 1 have no well-recognised meaning and leave the reader in doubt as to the meaning of the technical features to which they refer, thereby rendering the definition of the subject-matter of said claim unclear (Article 6 PCT).
